Percy BOUNDA

Mobile developer
Pointe-Noire, Congo-Brazzaville

Work experience

Freelance mobile developer
2021 –

I develop web and mobile applications that address challenges and solve complex problems.

- Improved operational efficiency by quickly identifying and resolving complex technical issues.
- Collaborated with clients from diverse sectors to develop tailored solutions meeting their requirements.
- Improved application load speed by 30% through code and resource optimization.
- Optimized application performance by reducing load times and improving responsiveness.
- Ensured ongoing maintenance to guarantee stable and reliable applications.
- Utilized React/TypeScript and Flutter/Dart to develop responsive and high-performance interfaces.

Front-end: Flutter (Dart), React (TypeScript/JavaScript)

Back-end: Django, Laravel

Databases: MySQL, PostgreSQL

Version Control: Git, GitHub

Other Tools: Docker, REST APIs, GraphQL

Side projects

OYI | oyi.gams-pro.com
2024

Attendance tracking application web and mobile for employees and individuals moving in buildings and business centers. Check web app for testing.

- Used in Mayombe tower to Pointe-Noire
- Developper of front-end in mobiles tablets devices

Education

Licence 2
2023– 2024

- Computer Engineer

Certification & courses

Scientific Baccalaureate, Series C
OpenClassRoom course of JavaScript

Skills

I develop mobile and web applications using technologies such as Flutter with Dart, as well as React with TypeScript/JavaScript. For the backend, I work with Django and Laravel to create robust and tailored solutions. I strive to deliver high-performance applications while continuing to improve my skills in these areas.

Kilo | kingstinexport.com

2024

Web and mobile application for tracking imported/exported packages between two sites.

- Used by KingstineExport for track packages
- Developper of front-end in mobiles devices
